GENERAL COMMENTS / INSTRUCTIONS

Today I completed your scheduled reoccurring rodent control service. During the inspection, I examined the exterior of the complex and did not observe any concerning issues. Additionally, I refilled and cleaned all of your rodent protection stations. The bait consumption rate was approximately 40%, with the highest activity observed in the station on the far back right fence line. Please note that this activity level may fluctuate seasonally, influenced by nearby construction and weather conditions.
Going forward We will monitor the property and adjust our tactics as needed.

Conducive Conditions:
- Overhanging branches touching or hanging over the complex can serve as a bridge for rodents.

Thank you for trusting Eastside Exterminators to protect your property.

Sincerely,
Kaden Spinelli
